RE: Mineral Exploration Drilling  
UTU-70949, UTU-71050

Dear Mr. Royer:

We have reviewed a description of exploration work as submitted to the Bureau of Land Management. We received a copy of the notice from the Bureau on December 10, 1994.

The plan we received describes drilling of 52 shallow exploratory holes on White Cloud #17.

It does not appear that the operation as described will have any water quality impacts. No permit is required for the stated activities. However, you must advise us for review of any water quality impacts if your activities generate any wastewater which would be discharged to the ground or surface waters of the State.

If we can be of further assistance, please contact me or Mr. Lyle Stott of my staff.

Sincerely,

Kiran L. Bhayani, P.E., D.EE., Manager  
Design Evaluation Section
